## II. SCOPE OF WORK

1. The State shall submit a program containing the aforementioned project to FHWA with the recommendation that it be approved for construction.

a. If such project is approved for construction by FHWA and the funds are available for construction of the project, the State with the aid and consent of FHWA will proceed to advertise for, receive and open bids, and subject to the concurrence of FHWA and the County, award the contract, enter into a contract with a firm to whom the award is made for the construction of the project, such project to be performed, completed, accepted and paid for in accordance with the requirements of the Standard Specifications for Road and Bridge Construction of the Highways Division, Arizona Department of Transportation. Further, the State will enter into a Project Agreement with FHWA covering the work embraced in said construction contract and will request the maximum federal funds available.

b. Should unforeseen conditions or circumstances increase the cost of said work required by a change in the extent or scope of the work called for in this agreement, the State shall not be obligated to incur any expenditure in excess of the amount of the County's deposit unless and until so authorized in writing by the County.

2. Prior to the solicitation of bids, the County shall deposit funds with the State in the amount determined by the State to be necessary to match federal funds in the ratio required.

Upon completion of the construction contract, the State shall return to the County any part of the funds deposited by the County remaining after County's pro rata share of the cost, as finally fixed and determined by FHWA, has been paid.

3. The County shall acquire, without cost to the State, the necessary right-of-way and hereby certifies that all necessary rights-of-way have been acquired.

4. The County shall remove from the proposed right-of-way all obstructions or unauthorized encroachments of whatever nature, either above or below the surface of the roadway, and hereby certifies that all obstructions and encroachments have been removed therefrom, prior to the start of construction.

5. The County shall not permit or allow any encroachments, except those authorized by permit, upon, or private use of, the right of way. In the event of any unauthorized encroachment or improper use, the County shall take all necessary steps to remove or prevent any such encroachment or use; failing in which the State shall have the right to proceed with the removal or prevention thereof, the cost of such removal or prevention to be borne by the County.

6. Upon completion of construction, the County shall provide for, at its own cost and as an annual item in its budget, proper maintenance, including, but not limited to, traffic signals, signs, islands, curbs and markings necessary for the purpose of regulating, warning and guiding traffic.

7. The County shall mark and sign school crossings and railway-highway grade crossings in accordance with the requirements of the current edition of the Manual on Uniform Traffic Control Devices for Streets and Highways.

8. By such regulation as it may by ordinance provide, the County shall regulate parking and not permit vehicles to be left on the street in any manner other than at and parallel with the curb and to restrict parking so as to prevent conflicts with moving traffic at intersections and at such other locations as necessary.

### III. MISCELLANEOUS PROVISIONS
